Hi!

Thanks for checking out the Brew Crafters Print and Play. Brew Crafters is a Euro-style worker placement and resource management game for 2-5 players. The play time is about 30 minutes per player. There are quite a few components in the game, all of which are listed in the full rules (the full rules are included as part of this Print and Play). There are some components that you'll need to play that aren't included in the PnP, however. Those are:

1. Colored cubes (or a suitable substitute for cubes) to use as the ingredients. The colors you use don't have to match these colors, but it would be best if they do.
   - 50 brown (malt)
   - 30 green (hops)
   - 20 yellow (yeast)
   - 10 black (coffee)
   - 10 orange (spices)
   - 10 red (fruit)

2. 20 research track cubes (4 for each player). They can be any color.

3. Chits/coins/token to use as money. 25 one-dollar chits and 15 five-dollar chits should do it. 25 pennies and 15 nickels will work just fine, too.

4. Something to use as the starting player token

Also note that you'll need to print 1 copy of the brewery_board.pdf for each player. So for a 5-player game, you'll need 5 brewery boards.

Its best to print the following 3 files on cardstock so that everything holds up better on multiple plays. Everything not listed here can be printed on regular printer paper.

- player_brewery_board.pdf
- other_components.pdf
- research_labs.pdf
